Ongoing

PROJECT SUMMARY

The NRW/Eastern Guruma Joint Venture has been contracted to undertake the bulk earthworks at Rio Tinto's Nammuldi Below Water Table (NBWT) Project

The project consists of earthworks for the processing plant, waste fine storage facility, mine service facilities, stockyard, an explosives compound, heavy vehicle haul roads, light vehicle roads, and a rail link with a train loading facility.

The Project scope includes:

- 5.7 kilometres of Heavy Haul Roads
- 12 kilometres of Light Vehicle Roads
- Over 3,000,000 cubic metres of excavation
- Over 690,000 cubic metres of drill and blasting
- Over 7,000 lineal metres of culverts

The Project will run for 37 weeks commencing in May 2013 and at its peak will have over 400 personnel mobilised to site.
