Nov 2013

PROJECT SUMMARY

Eastern Guruma in joint venture with NRW undertook the concrete and civil works at Western Turner Syncline Mine. The scope of works included the installation of approximately 21,000 cubic metres of concrete for the following areas:

- Primary crusher
- Overland conveyor
- Plant utilities

The project also included the erection of a corrugated steel arch, minor earthworks, fencing and bollards.

The project ran for approximately 82 weeks and had a peak workforce of 225 personnel.
